

Simple folding and coding appliance

# GRISOTUB M

A few hand movements and your metal tube is folded and coded

**GRISO**TEC

FILLING AND CLOSING TECHNIC

Simple folding and coding appliance

## GRISOTUB M

With some hand movements you close your metal tubes with a double fold and subsequently you emboss the tube fold with a production code. This appliance is suitable for laboratories in pharmaceutical companies or the food industry as well as for small scale production in drug stores or pharmacies.

### WORKING METHOD OF GRISOTUB M

The operation of this appliance is very easy:

At first you insert the filled tube vertically and by pulling of the hand lever the tube end will be squeezed; afterwards you insert the tube horizontally and bend it over to get a fold; this procedure has to be repeated so you receive a double fold; finally you insert the tube in the coding slot for embossing.

### TECHNICAL DATA

<a href="#">Dimensions</a>	<ul style="list-style-type: none"><li>• width 120mm</li><li>• depth 200mm</li><li>• height 330mm</li></ul>
<a href="#">Weight</a>	<ul style="list-style-type: none"><li>• approx. 3.6kg</li></ul>
<a href="#">Tube dimensions</a>	<ul style="list-style-type: none"><li>• length 30 – 250mm</li><li>• Ø 10 – 50mm</li></ul>
